

# Reproducible Machine Learning Results' Checklist in Bioinformatics

Hamidreza Heidarzadeh, Tristan Glatard

Department of Computer Science and Software Engineering

Concordia University, Montréal, Québec, Canada

## **1 Abstract**

### **1.1 Background**

### **1.2 Results**

### **1.3 Conclusion**

## **2 Introduction**

## **3 Materials and Methods**

### **3.1 Dataset**

### **3.2 Features**

### **3.3 Models**

#### **3.3.1 Data Preprocessing**

##### **3.3.1.1 5-Folds out of Shuffled Dataset**

##### **3.3.1.2 5-Folds out of Each Class**

##### **3.3.1.3 Sub-Sampling**

#### **3.3.2 The Model**

##### **3.3.2.1 7-class-based Model**

##### **3.3.2.2 8-class-based Model**

### **3.3.3 The Algorithm(SVM)**

#### **3.3.3.1 Gamma and Cost**

## **3.4 Models' Evaluation**

### **3.4.1 Metrics From The Paper**

#### **3.4.2 Micro vs Macro**

## **4 Results**

## **5 Discussion**

## **6 Conclusion**

## **References**
